ELSEVIER

Mechanisms of Development 49 (1995) 241–242

Volume contents

Volume 49 (1995)

Issue contents 1

K. Manova, V. De Leon, M. Angeles, S. Kalantry, M. Giarré, L. Attisano, J. Wrana, R.F. Bachvarova
mRNAs for activin receptors II and IIB are expressed in mouse oocytes and in the epiblast of pregastrula and gastrula stage mouse embryos 3

J. Riese, R. Zeller, R. Dono
Nucleo-cytoplasmic translocation and secretion of fibroblast growth factor-2 during avian gastrulation 13

D. Uwanogho, M. Rex, E.J. Cartwright, G. Pearl, C. Healy, P.J. Scotting, P.T. Sharpe
Embryonic expression of the chicken *Sox2*, *Sox3* and *Sox11* genes suggests an interactive role in neuronal development 23

S. Stein, M. Kessel
A homeobox gene involved in node, notochord and neural plate formation of chick embryos 37

L. Bally-Cuif, M. Gulisano, V. Broccoli, E. Boncinelli
c-otx2 is expressed in two different phases of gastrulation and is sensitive to retinoic acid treatment in chick embryo 49

I. Minoura, H. Nakamura, K. Tashiro, K. Shiokawa
Stimulation of circus movement by activin, bFGF and TGF-β2 in isolated animal cap cells of *Xenopus laevis* 65

S. Ibnsouda, F. Schweisguth, D. Jullien, C. Kücherer, J.-A. Lepesant, A. Vincent
Evolutionarily conserved positive and negative cis-acting elements control the blastoderm-specific expression of the *Drosophila serendipity* α cellularisation gene 71

M. Mével-Ninio, R. Terracol, C. Salles, A. Vincent, F. Payre
ovo, a *Drosophila* gene required for ovarian development, is specifically expressed in the germline and shares most of its coding sequences with *shavenbaby*, a gene involved in embryo patterning 83

M. Haenlin, W.F. McDonald, C. Cibert, E. Mohier
The angle of the dorsoventral axis with respect to the anteroposterior axis in the *Drosophila* embryo is controlled by the distribution of *gurken* mRNA in the oocyte 97

S.J. Poole
Conservation of complex expression domains of the *pdm-2* POU domain gene between *Drosophila virilis* and *Drosophila melanogaster* 107

T.A. Rosenquist, G.R. Martin
Visceral endoderm-1 (VE-1): an antigen marker that distinguishes anterior from posterior embryonic visceral endoderm in the early post-implantation mouse embryo 117

H. Nakamura, K. Tashiro, T. Nakamura, K. Shiokawa
Molecular cloning of *Xenopus* HGF cDNA and its expression studies in *Xenopus* early embryogenesis 123

J. Reinitz, D.H. Sharp
Mechanism of *eve* stripe formation 133

Issue contents 159

P.P. D'Avino, S. Crispi, L.C. Polito, M. Furia
The role of the *BR-C* locus on the expression of genes located at the ecdysone-regulated 3C puff of *Drosophila melanogaster* 161

N.E. Baker, A.E. Zitron
Drosophila eye development: *Notch* and *Delta* amplify a neurogenic pattern conferred on the morphogenetic furrow by *scabrous* 173

M.E. Lane, D. Kalderon
Localization and functions of Protein Kinase A during Drosophila oogenesis 191

F.L. Conlon, C.V.E. Wright, E.J. Robertson
Effects of the T^{Wis} mutation on notochord formation and mesodermal patterning 201

R. Wilson, T. Mohun
XIdx, A dominant negative regulator of bHLH function in early *Xenopus* embryos 211

M. Rissi, J. Wittbrodt, E. Délot, M. Naegeli, F.M. Rosa
Zebrafish *Radar*: A new member of the TGF-β superfamily defines dorsal regions of the neural plate and the embryonic retina 223
